

Setting WCS Tube Trap

DO NOT DRY FIRE THIS TRAP

1: Place the trap on the ground with the trigger mechanism facing away from you and push the trap up against your knees.

2: Place both hands on top of the trap with your thumbs on the killing bar.

3: Push the killing bar all the way down to the bottom making sure the safety and trigger catches are back out of the way.

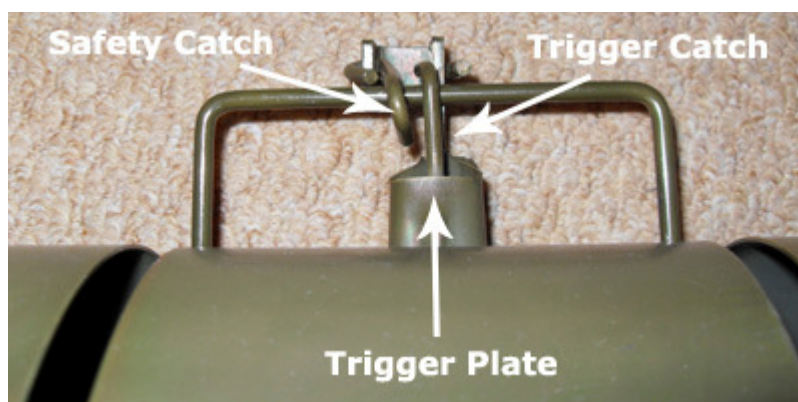

3.1: Engage the safety catch onto the killing bar.

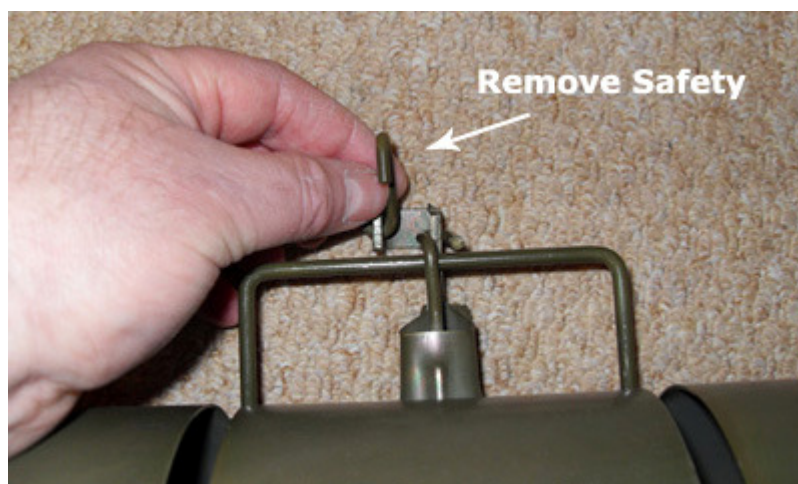

4: Push the killing bar down and bring over the trigger catch with your forefinger and with your middle finger lift the trigger plate and engage the trigger.

5: The trap is now set.

6: Remember to remove the safety catch before departing.

DO NOT DRY FIRE THIS TRAP

To unset just reverse the setting instructions and release the spring in a controlled manner.
